Welcome to Animal Medical Center

Dr. Steve Myers and his team are committed to bringing you and your pets better health by practicing the science of Veterinary Medicine. Murfreesboro based Animal Medical Center was founded in 1998. Since then our staff has been performing veterinarian medicine and compassionate animal care in the Murfreesboro area.

Animal Medical Center is a full-service Animal Hospital whose mission is to provide the highest standard of quality and compassion in veterinary care for our patients and welcoming, informative, and supportive service for our clients, while maintaining a superior working environment for our employees.

Animal Medical Center offers the Murfreesboro animal community emergency veterinary services in addition to standard medical, surgical, and dental veterinary care. Because we have an in-house pharmacy, lab, radiology facilities, and Intensive Care Unit, our facility enables you to make one stop for your pet's medical care.

We are open for appointments during normal business hours and Saturdays until 3pm. We are always available in an emergency, just call or come in, day or night.
